Subject: RE: Overnight workshop re 3838 case study analysis

Sandy Whit

either suits Thursday is clear for me at this time -

we probably also will need access to the file beforehand so we can speak from a management perspective on issues regarding long term high risk sources.

As I have always said, the difficulty comes for us when the motivation changes.

I don't think we ever got to the bottom of this sources motivation - we did some guessing but the crystal ball will tell us we may have been off the mark.

I think there are some issues from a management point of view that we can do better!! Should management have met the source is 1 - my view is no - there is probably a good argument for us to have done so.

Changing the code is another we need to discuss - any tactical issues it caused, is it a good strategy? Should we do it again should the need arise.

The branding of this person as a human source became a significant issue - I think we scraped through by good luck rather than good management (██████████ / ██████████ Purana issues).

The constant changing of Crime Department squad managers is a significant risk for human source management - there are some currently in the building that I DO NOT TRUST AT ALL - some of them maybe placed into sensitive areas into the future.

We probably also need to prepare ourselves for the inevitable Court process & what our position will be.

See I have been thinking about these issues.

Regards

Sandy White-O

Subject: Overnight workshop re 3838 case study analysis

We have selected a venue for the workshop, it will be the ██████████ Surf Life Saving Club. We have two dates available at this venue:

Monday night 2nd March, returning Tuesday.

Wednesday night 4th March, returning Thursday

I intend that the 3838 handling team will travel down early on day 1 and prepare reward application material relevant to 3838/2958. Remaining members will travel down in the afternoon, stay overnight and be prepared to discuss overall management of that particular source as well as a couple of other long term sources, the next day.

I will prepare the agenda and dot point issues to be considered prior to the workshop, when we have locked in the date.

Please let me know if you have preferences for either night asap.

Andy - I would think both yourself and Mr. BIGGIN should attend on day 2.

^{PII} [REDACTED] - I think you will have something worthwhile to contribute to this discussion. Can you let me know if I need to speak to Doug F re your availability.
