

Name: Mr Cooper

States:

My full name is Mr Cooper . My personal details are known to the Police in this matter. I request that no details be given out regarding myself without my approval.

I have already made a number of statements to Police regarding my drug trafficking over the last few years. Some time ago Police asked me about a guy called Stephen GAVANAS. I advised them that I know GAVANAS and knew him as Steve or Oggy. I knew his last name as GAVANAS. I was aware that Oggy was from Sydney but living down in Melbourne.

I first met Oggy back in early 2005 at the Grove Coffee shop in Sydney Road, Coburg. I was introduced to Oggy by Horty MOKBEL. I was told by Horty that Oggy was a 'huge' pseudo cook. He told me that Oggy was the 'best around'. By pseudo cook I mean that he manufactured amphetamines via the pseudoephedrine method. There are basically two ways to manufacture amphetamines, being the pseudo method or the P2P method. P2P being Phenyl-2-Propanone. I have previously explained my expertise in amphetamines manufacturing in previous statements. Basically I have manufactured large amount of amphetamines over a long period of time. These have been detailed in other statements I have already made. This also involved Mr Clark
Mr Clark

During the introduction I was told by Oggy and Horty that he (GAVANAS) had contacts in Sydney. Oggy and Horty told me that he was from Sydney. He was charged with drug offences in Sydney and on bail while being in Melbourne. Oggy told me that he could get glassware and Methyl Amine and a number of other chemicals including Ketone (P2P). By glassware I mean that he could get me glassware that I could use in my labs to manufacture amphetamines. The chemicals I'm talking about are all chemicals used to manufacture amphetamines.
